

## WHAT'S NEW FOR 2007

- **New Programs:**

The Radon Protection Program is joining the Performance-based Contract Process for disseminating funding to local agencies and local Radon Information Centers.
- **Formula Allocations:**

All programs funding formulas have been updated with (1) new population estimates and (2) local health department level determinations.
- **Template Objectives:**

Many of template objectives reflect desired program direction, in line with state and federal requirements associated with the funding.
- **Timeliness:**

Designate a back-up negotiator if a response is not possible within seven working days.

Complete negotiations within four (4) weeks of entering objectives for a program. If negotiations are not completed within four weeks or October 31, 2006, the regional office contract administrator will schedule a conference call to complete.
- **Grants and Contracts (GAC) System:**

Final versions of the program boundary statements and program quality criteria will be available in the GAC.

Currently, some other enhancements are being worked on. We will communicate with you as those are completed.
- **DHFS Webpage**

The following website contains all training materials and links to webcast training sessions: <http://dhfs.wi.gov/Health/GAC/index.htm>
